### **Ecliptek's New REACH Compliance Policy Added to Website**

*Ecliptek Corporation announces detailed program  
to address environmental requirements for crystal and oscillator products*

February 23, 2010

Costa Mesa, CA - Ecliptek Corporation, a leading supplier of frequency control products, has introduced its [REACH Compliance Roadmap](#) to address the European Union's Regulation for Registration, Evaluation, Authorization, and Restriction of Chemicals initiative. The main objective of REACH is to improve protection of human health and the environment from the risks of certain chemical substances. REACH legislation mandates that any organization producing, importing, using or placing a substance, mixture or article on the EU market will be responsible for ensuring that it is in compliance with REACH regulations.

"Ecliptek's new REACH program will provide our customers with access to the critical environmental information they require", stated Thomas Culhane, Ecliptek's Vice President of Quality Assurance. "Our customers can utilize our website to obtain information about REACH regulation and to request REACH compliance statements for specific Ecliptek crystal and oscillator part numbers."

Ecliptek has established an environmental compliance team that meets regularly to coordinate all company REACH related policies. The company is implementing processes and procedures with its suppliers and customers to offer REACH compliant articles (components and assemblies). Questions about REACH can be found on Ecliptek's [REACH FAQs](#) section of their website. Ecliptek is committed to meeting or exceeding the requirements of all applicable REACH laws and regulations.
