Ecliptek's SMD Crystals Provide Effective Solution for Portable Devices

Ecliptek's extensive surface mount crystal product offerings support a wide array of applications, including handheld and portable devices

February 25, 2009

Costa Mesa, CA - Including SMD package sizes as low as 2.5mm X 3.2mm x 0.7mm, Ecliptek's comprehensive family of miniature surface mount quartz crystals reduce board space requirements, making them the preferred solution for hand held and portable devices.

With multiple package and pad layout combinations, Ecliptek SMD crystals provide maximum flexibility for challenging board layouts. Available in fundamental and third overtone modes, these devices are offered over the frequency range of 3.579545MHz to 70.000MHz across the various package configurations.

Ecliptek has incorporated numerous [tools](#) on their website to improve the users' ability to determine the optimum product for a specific application. Ecliptek has enhanced the filtering capabilities of its product page to insure that its customers can quickly and efficiently determine the series best suited to their application.

Ecliptek's website also features instant access to the world's largest [inventory](#) of frequency control products.
