Ecliptek Releases Another Phase of Website Upgrade

New Design Makes it Easier for Visitors To Locate Inventory, Request Samples, and Generate Quick Quotes within Seconds

April 1, 2009

Costa Mesa, CA - Ecliptek Corporation, a leading supplier of crystals and oscillators for over 20 years, unveiled another phase of its redesigned website today. The latest refinements significantly reduce the time users spend requesting and receiving quotes and samples.

"Ecliptek's website has been the keystone of our company's operations for over 10 years," declared Robert Zarrow, Vice President of Sales. "Our team's focus was to better integrate our newly improved Part Search and our dynamic Part Number Constructors with our Quick Quote and Sample Request systems. The process flow for finding the specific part numbers you need and then getting them into a Quote or Sample Request is now very efficient."

Visitors to Ecliptek's site will be able to:

- Use the Part Search to find crystal and oscillator products by part number or by selecting their key parametric criteria

- Construct part numbers by inputting parametric data on our Series pages

- View both Ecliptek and Distributor stock, which comprises the world's largest inventory of crystal and oscillator products

- Add any valid part number to their Quick Quote and receive a

comprehensive quote in less than 60 seconds

Save favorite part numbers in their Parts List

"Streamlined access to comprehensive content combined with state of the art tools providing real time information around the clock is the key," stated Zarrow. "This ability to offer world class web-based services to our customers affirms Ecliptek's total commitment to service excellence."

About Ecliptek
