

Ecliptek Website Now Features Fully Automated Quotation System

For Immediate Release

Ecliptek Corporation, a leading supplier of frequency products for over 20 years, has completed system upgrades that will improve its customer service with their ground breaking online quotation system.

Costa Mesa, CA August 6th, 2008

Ecliptek has once again established a new standard for functionality with the latest version of its website. Key amongst the features is a unique online quote system that is designed to provide users with detailed information about Ecliptek crystal resonator and oscillator products far beyond just price and delivery, typically within seconds.

In addition to unit cost and lead time information, the system will automatically include available factory inventory, links to configuration specific data sheets and RoHS status.

What elevates the Ecliptek online quote system is its ability to automatically include alternative part numbers, when available, based on lower unit cost, reduced lead time, or RoHS compliance.

"I give you folks an A+++ ... other component vendors should use your website as a model," declared Rob Figler, Principal Hardware Engineer for a telecommunications manufacturer in New Hampshire. "This is the standard by which I will judge all others."

"Our customers now recognize that Ecliptek has created an innovative tool to obtain accurate, detailed quotations anytime, anywhere around the world in less than a minute." said Cary B. Rosen, President and CEO of Ecliptek Corporation. "Dynamically offering potential alternative products with the intent of saving the customer money is unprecedented."

When an alternative Ecliptek product is offered, the quotation provides links to configuration specific data sheets for the original part number as well as the recommended alternate part number, simplifying the component engineer's evaluation process.

Ecliptek will continue to develop automated tools online that enable users to access comprehensive information to meet the growing demand of its global customer base.
