

Ecliptek's Searchable DRC Conflict Free and REACH Documentation Exceeds 3,000,000 Unique Part Numbers

Customers are now able to quickly sort through the world's largest crystal and oscillator selection using SmartSearch app

October 1, 2014

Costa Mesa, CA – Recognizing the value customers place on documentation, [Ecliptek Corporation](#) has taken another significant step by expanding the company's database to over three million unique part numbers. Users can quickly find part number level documents within seconds using an Ecliptek part number or the [SmartSearch](#) web app, which offers customers a simple process to find parts by selecting and prioritizing parametric values.

"In light of today's dynamic regulatory and environmental update requirements, component sourcing is about documentation," exclaimed Robert Zarrow, Vice President of Global Customer Support for Ecliptek. "There is a greater emphasis on disseminating comprehensive data through a multitude of sources, with more and more customers relying on third parties."

Aggregators and global Authorized Distributors participating in Ecliptek's Data Download program offer quick accessibility to Ecliptek's industry leading frequency control part number database. The automated download delivers a direct feed from Ecliptek, insuring that the most accurate information is available through third party search tools.

Many of these aggregating websites offer users sophisticated BOM management applications featuring direct access to Ecliptek's on-demand documentation. The millions of crystal and oscillator part numbers in Ecliptek's data feed include the latest Data Sheets, REACH, RoHS, China RoHS, and IPC-1752 documentation.

"One of our top priorities is to make it easy for our customers to find accurate information and documentation for Ecliptek parts," stated Tony Cunningham, Director of Business Systems Analysis. "We accomplish this by not only providing unmatched data access on our own website, but also through automated data sharing with industry leading electronic component data aggregators and the majority of our Authorized Distributors."

About Ecliptek

Founded in 1987, Ecliptek has become a leading supplier of frequency control products to the electronics industry. Ecliptek provides complete engineering support, unparalleled customer service and innovative products to their OEM customers and distributors worldwide. Complete information on company operations or any of Ecliptek's quality frequency control devices can be obtained by visiting Ecliptek's internet site at www.ecliptek.com. The company's Email address is customersupport@ecliptek.com.
